

MLOps

MLOps

■ NVIDIA MLOps

Data collection is the process of gathering raw data from various sources.

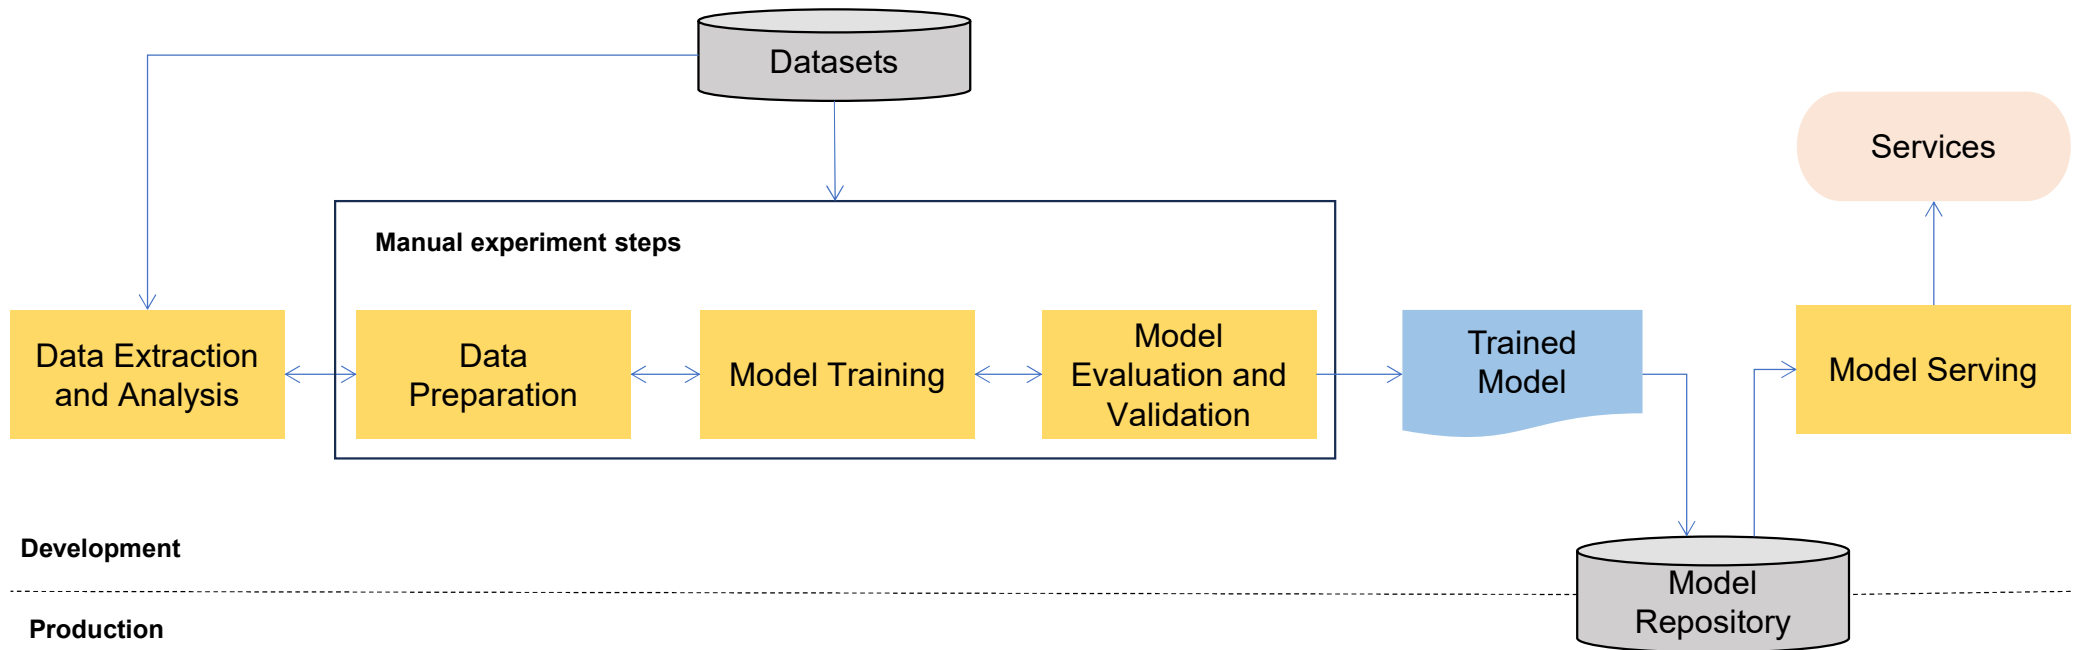

Data ingestion is the process of taking data from various sources and preparing it for analysis. This can involve transforming the data, cleaning it, and structuring it so that it can be easily analyzed.

MLOps

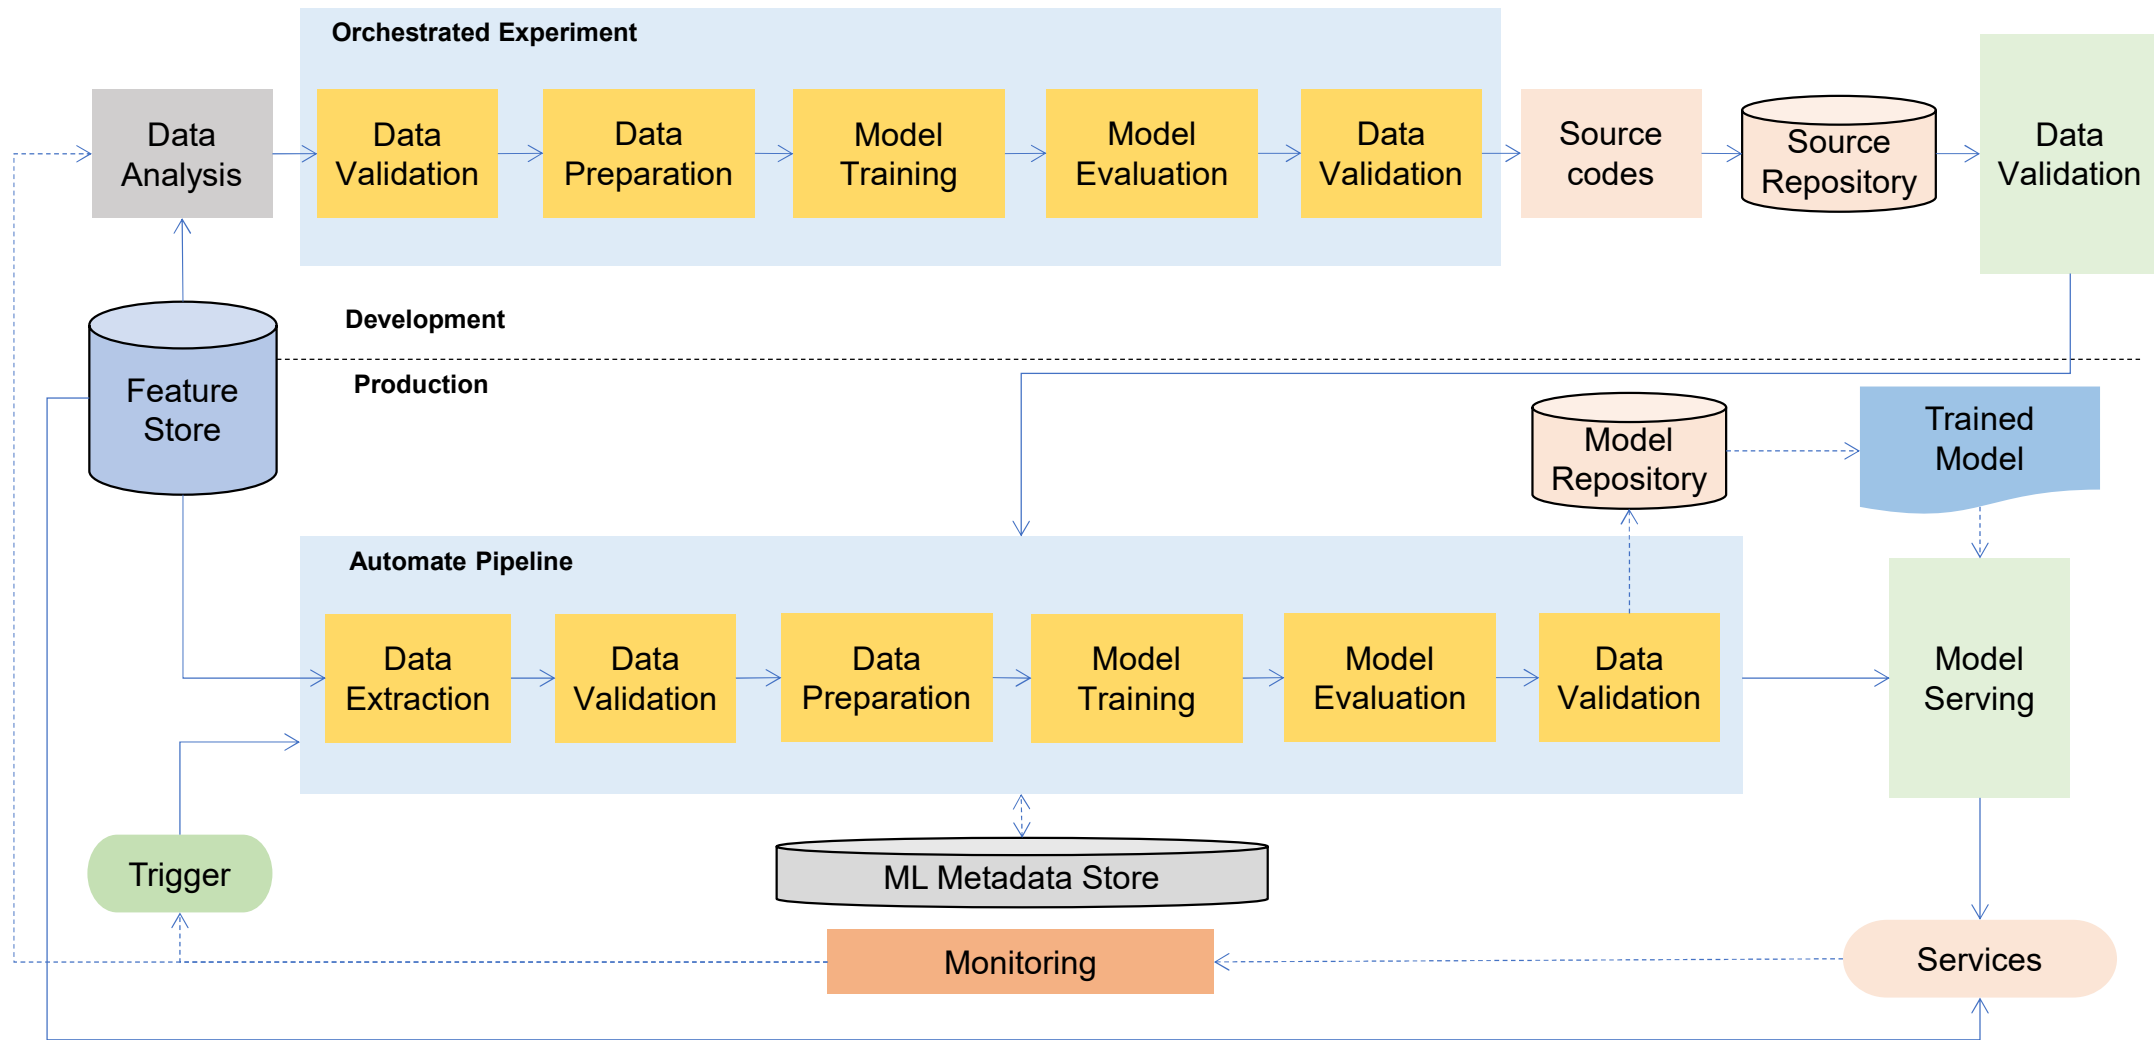

- Data Scientists
 - ✓ Use ML/DL framework
 - ✓ Process data for learning
 - ✓ Learn Models in Large scale

- Data/Software Engineers
 - ✓ Reuse ML/DL tool and platforms
 - ✓ Monitor learning procedures
 - ✓ Serve Models
